## SUMMARY

I'm Samran Asif, a dedicated and results-driven PHP and MERN Stack developer with over 5 years of hands-on experience in crafting robust and scalable web applications. I specialize in designing and developing both static and dynamic websites that are tailored to meet client needs and business objectives. My technical expertise spans a wide range of modern technologies, including PHP, Shopify, WordPress, Laravel, MongoDB, Node.js, Express.js, and React.js. I am passionate about clean, efficient code and am committed to delivering high-quality solutions that offer great user experiences, strong performance, and long-term maintainability.

## EDUCATION

### Bachelor in Software Engineering

University of Engineering & Technology

📅 10/2019 - 07/2023

### FSc Pre Engineering

Garrison Grammar College

📅 10/2017 - 08/2019

## PROJECTS

### Online Learning Platform

Built an online learning platform with user authentication, course enrollment, video lessons, quizzes, and an admin dashboard.

### Library Management System

Developed a library management system for tracking books, managing users, handling borrow/return operations, and generating reports.

### E-commerce Site

Created a fully functional e-commerce site with product listings, a shopping cart, user accounts, order management, and payment integration.

### Employee Management System

Built an employee management system to handle employee records, attendance, roles, and payroll using PHP, MySQL, and Laravel.

### Chart of Accounts

Developed a Chart of Accounts module for managing financial accounts, categories, and transactions using Laravel and MySQL.

### POS (Point of Sale) System

Created a POS system for handling sales, inventory, billing, and customer data with real-time updates using Laravel and React.js.

### Relationship/Dating Website

Developed a relationship/dating website with user profiles, matching algorithms, chat features, and privacy controls using the MERN stack.

### University Admission System

Developed a University Admission System for handling applications, student registration, course selection, and document management

### Cybersecurity Website

Built a cybersecurity website offering security tips, vulnerability scans, and incident reporting features using WordPress and PHP.
